Be careful with your camp fire,

Mr. and Mrs. W. A. Todd with  
their daughter Mae and Miss  
Maggie Bailey returned from  
their holiday on Sunday night.  
They visited at Evans in the Red  
Deer district with Mrs. Todd's  
brother, A. L. Stewart and his  
wife, and while there attended the  
stamped at Benalto. They then  
spent a few days in the Clear Water  
district fishing, going next to  
Sylvan Lake where they camped  
for a few days, then on to  
Aldersyde and Calgary. They  
report crops everywhere as in  
much the same condition as at  
Chinook.

Mr. and Mrs. J. E. Morris and  
Mr. Morris' sister, who have been  
visiting at the home of R. Peyton  
left Monday for Daysland, St. L.  
and Edmonton where they will visit a few days before returning  
to Killam, visiting relatives there.

## LOCAL ITEMS

Mrs. J. L. Ferguson left this  
week for Lewiston, Idaho. Mrs.  
Ferguson has not seen some of  
her brothers for twenty five years,  
and the family have planned for a  
family re-union.

Mrs. Holmes of Bromhead,  
Sask., is visiting her daughter,  
Mrs. Norman G. Kerr.

Ethel Young has received word  
that she has completed her grade  
XI standing, having passed in the  
recent departmental examinations  
with good results in chemistry  
(93 p.c.) and geometry (94 p.c.).

Mr. and Mrs. Duncan and son  
Ewart, Mr. and Mrs. N. D. Stewart  
Mr. and Mrs. Spreeman, Mr. and  
Mrs. McDowell and family returned  
from Red Deer where they  
have been attending the Nazerine  
camp meetings.

The Ladies' Aid of the United  
Church served supper in the  
church on fair night, the proceeds  
of which amounted to about \$65.

Mr. and Mrs. Pat McKenzie,  
and a family of Granum arrived here  
by motor on Monday and will  
spend a week or two visiting  
friends in this district. They are  
guests of Mr. and Mrs. Rennie.

Mr. McGaffin and Mr. and Mrs.  
Alex Moore of Carsairs visited at  
the home of H. Howton on Monday.

Miss Vera Youngren of Kin-  
mundy is visiting Mrs. A. H.  
Herrington, Big Stone, and Mrs.  
Walter Anderson this week.

There was a large attendance  
at the service which was held at  
Clover Leaf school on Sunday.  
The student preacher is Mr. Yeom-  
an of Toronto.

G. Ray Robison and family re-  
turned this week after having  
spent a vacation at Carseland and  
Calgary.

Nestor Anderson (father), two  
brothers, Gilbert and Arnold, with  
their wives, of Portland, are visiting  
at the home of Walter Anderson. Mr. and Mrs.  
Anderson gave a dinner party in  
honor of their guests on Friday.

Jas. Young met with a slight  
accident while helping to arrange  
things in the agricultural hall when  
a piece of wire struck him in the  
eye. He immediately drove to  
Cereal and Dr. Esler found that  
the sight would not be injured,  
although it might have been more  
serious.

A. J. Mumford returned Tues-  
day after two weeks spent at vari-  
ous points in the southern and  
western parts of the province. He  
reports having seen some good  
crops in the south which will give  
a good yield providing they get a  
little more moisture.

Mr. and Mrs. Thos. Lengsfar  
of San Bon, Texas, are spending  
a few weeks at the home of the  
former's parents.

William and Roy Kidd of Al-  
askas are visiting at the home of  
Mr. and Mrs. Isbister this week.

Miss Lillian and Cameron Stew-  
art of Calgary arrived here this  
week to spend their vacation with  
their father, David Stewart.

P. Demeare, Mrs. Loader, Mr.  
and Mrs. Young motored to Ed-  
monton last week. Mrs. Loader  
visited her little son who had been  
ill with infantile paralysis and  
found there was a decided im-  
provement in him since her last  
visit. The party then motored  
to Killam, visiting relatives there.

## ONE OF THE MOST SUCCESSFUL FAIRS

Attended By a Large Crowd—  
Good Number of Exhibits and  
Good Ball Game

The sixteenth annual fair of the  
Chinook and District Agricultural  
Society on Tuesday could not  
have been held under more favorable  
weather conditions. The attendance  
was about on a par with last year, though the number of  
entries in some classes were not  
so large.

The number of horses shown in  
the different classes were larger  
than in 1928, and among them  
were some promising colts.

The number of cattle exhibited  
about held their own in points of  
numbers. Only one registered  
animal was shown, and that was a  
Red Polled bull owned by N. D.  
Morrison, which the judge con-  
sidered as one of the best dual  
purpose animals he had seen for  
some time, and awarded him the  
championship ribbon.

In the aged hog classes the  
number was limited and did not  
in any way show what the farmers  
are capable of producing. The  
younger pig classes were more  
plentiful and quality fair.

Sheep were lacking in numbers,  
but the quality was good.

While poultry classes were good  
they did not occupy much space.  
We know there are many in the  
district who are getting into the  
poultry business, and trust they  
will not neglect to show their  
birds another year.

There were only three competi-  
tors for the stock judging contest.  
Earl Robinson, 1st with 70 per  
cent; Wilfred Morrison, 2nd with  
30 per cent; Mary Elder, Young-  
town, with 25 per cent. From the  
short address given by the judge  
will no doubt be very helpful to  
the young competitors. This is  
one of the items we would like to  
see the directors encourage an  
other year.

In grains, grasses and vegetables  
the number of exhibits were not  
as large as on previous occasions,  
though for this year the showing  
would be hard to beat.

There was a very fine display  
of fancy work, home cooking,  
canned fruits, etc. In those classes  
the number of exhibits was larger  
than the previous year. The  
school work was good, but the  
number of exhibits was small.

However, the directors are to be  
congratulated for what has been  
accomplished this year, and now  
that the grounds are rounding in  
to shape and with the same co-  
operation, another year should see  
a still better fair than even the  
best of last year.

The list of prize winners will  
be published as soon as we can  
obtain them.

During the afternoon the sports  
committee handled on a number  
of events, in which a many of the  
younger ones of the community  
took part.

The baseball game between  
Oyen and Chinook was a fair ex-  
hibition of ball. Oyen was first  
to bat and secured two runs in the  
first innings and four in the third,  
while Chinook failed to find the  
home plate. In the first half of  
the fourth Oyen was blanked.  
For the home team Vanhook was  
first to bat, obtained a nice hit  
from which he reached third base,  
but with other batters following  
on Chinook only succeeded in scoring  
one run. Jordan was warming up  
all the time and with fair support  
Oyen was again held scoreless.

It was stated in evidence at the  
inquest by Dawson that the col-  
lision occurred when he was trying

Another Bad Auto Accident

L. S. Dawson Charged With  
Man-slaughter and is on \$12,000 Bail

Harry Sheets of Cochrane, aged  
33 years, died Monday morning  
as the result of a head-on colli-  
sion between two automobiles on  
the Banff trail, 12 miles west of  
Calgary at 9:30 o'clock Sunday  
evening. Four other persons were  
injured.

The injured are: Kenneth Daw-  
son of Chinook, 13 years of age,  
who was cut about the face with  
broken glass; Evelyn Dawson, his  
sister, right arm cut by glass, and  
Edith Dawson, six years, and Jean  
Switzer, seven years, 1811 William  
street, Calgary, also cut by flying  
glass. The driver of the car, L.  
S. Dawson of Chinook, Alberta,  
and his wife were unhurt.

Sheets was the only occupant  
of the car which collided with that  
driven by Dawson.

Lewis S. Dawson, of Chinook,  
Alberta, was charged with man-  
slaughter by the provincial police  
Wednesday morning and was al-  
lowed out on bail. The charge  
followed the fatal accident to  
Harry Sheets, Cochrane, who died  
Monday following a collision on  
the Banff trail.

Lewis S. Dawson, driver of the car  
struck by that driven by Mr.  
Sheets, told of trying to pass an  
automobile driven by Harry An-  
derson. He saw Mr. Sheets car  
approaching and tried to draw over

to pass another car. Sheets was  
driving an auto in the opposite  
direction to Dawson.

Dawson was formally arrested  
Wednesday morning by the Al-  
berta provincial police. He was  
represented by F. S. Selwood and  
allowed out on bail, himself at  
\$6,000 and three sureties of \$2,000  
each.

The preliminary hearing of the  
case is scheduled to take place at  
the city police court on Aug. 7.

An open verdict was returned by  
the coroner's jury which met to  
inquire into the cause of Harry  
Sheets' death in an automobile  
accident on the Banff road on Sun-  
day. The verdict read as follows:

"We, the jury, find that Harry  
Sheets came to his death in the  
general hospital, Calgary, on July  
29, from concussion of the brain  
received in an automobile accident  
on the Banff trail about twelve  
miles west of Calgary on the night  
of July 28, by coming in contact  
with a car driven by L. S. Dawson  
of Chinook."

Lewis S. Dawson, driver of the car  
struck by that driven by Mr.  
Sheets, told of trying to pass an  
automobile driven by Harry An-  
derson. He saw Mr. Sheets car  
approaching and tried to draw over

## Beautifying the Grounds Surrounding Rural Schools By Planting Trees and Hedges

At the beginning of this century when in the face of much indifference and no little opposition the Department of the Interior through its Forest Service began the distribution of free trees to farmers in Western Canada, the chief objects were to make the prairie farms more homelike and comfortable and the farms themselves more productive. In the nearly thirty years that have elapsed since then, because of a realization of the widespread benefits of prairie tree planting, apathy and opposition have given place to enthusiasm and support of this policy. The annual distribution has grown from a meagre 50,000 trees in the first years to approximately 800,000 seedlings and cutlings at the present time. Reports show that a large percentage of the new shelter-belts set out are successful and travellers are constantly noting the change in the appearance of large sections of the prairie through the planting of these trees.

The Department distributes forest trees exclusively and, as has been frequently noted in recent years, the effect has been to encourage the development of homelike and the growing of small fruits and tender vegetables which, formerly, it was thought, would not grow in the Middle West. Another very pleasing change which has followed the general adoption of the plan of tree planting on farms has been the improvement in the grounds and surroundings of rural schools in the prairies. Naturally the improvement of school grounds is a much more difficult matter than that of planting groves around farm homes. The chief difficulty, of course, is the constant changing of teaching staff and of rural school trustees. Added to this is the fact that school vacation occurs at the very time when in the first three years after planting the trees require attention in order to ensure their subsequent growth.

In spite of these handicaps a great deal has been accomplished. In the province of Saskatchewan there are approximately 4,800 rural schools and of these 1,000 have applied for and received trees from the Forest Nursery Station at Indian Head and Sutherland. While the proportion of plantations which have become permanently established on school grounds is not so high as in the case of those on farms, the results on the whole are decidedly encouraging.

The average prairie school with its surroundings is anything but inspiring, and it is not difficult to realize the effect such conditions must have on the impressionable minds of the young children who necessarily spend so much of their time there. If every rural school could be surrounded by an attractive setting of trees, shrubs, and flowers the ultimate value to the community and the country as a whole would be incalculable.

That the handicaps under which the average school labours in respect to the improvement of the surroundings can be overcome is evident from the record of those that have been successful. In some cases the success has been outstanding and in such it is generally evident that the community as a whole has taken special pride and interest in the school, that there is close co-operation between the trustees, the teacher, and the neighboring farmers, and that all are interested in seeing that the trees receive the necessary attention. In such localities the school grounds become a community centre and are used for picnics and other gatherings thus proving a valuable asset in the general development of the district.

### Was Hard Worker

Sir Walter Scott rose at four every morning and worked fifteen hours a day. He wrote the Waverley novels at the rate of twelve volumes a year, and averaged a book every two months during his working life.

"You are the author of 'A thousand ways of earning a living,' so why are you begging?"

"That is one of the thousand ways."—Esquella, Barcelona.

W. N. U. 1796

### Experiments In Government

**Speaker Draws Attention To Advanced Legislation In New Zealand**

"Australia and New Zealand, particularly the latter, have gone farther with experiments in government than either Canada or the United States," said Col. Wilbur S. Tucker, former president of the Bankers' Insurance Company, of New York, and now a resident of New Zealand. He was addressing a luncheon gathering of the Canadian Club at Vancouver. "It may well be," he added, "that these experiments of the Antipodes will be written into the statutes of Canada and other nations of the world before long."

In experiments with government and private industrial enterprises, no nation had gone farther than New Zealand, Col. Tucker declared.

He did not mean to give the impression that he was offering criticism of any nation's laws or regulations. Both railways and telegraphic services in New Zealand were government controlled and their workings were most satisfactory, he pointed out. But life insurance, fire insurance, trust company work, old age pensions, disability and maternity insurance were other departures in state enterprises. He recognized that Canada, too, had advanced far along such lines of social service legislation.

### Made Political History

Miss Megan Lloyd George made political history when she attended a dinner given to members of Parliament belonging to her father's party, the Liberals, by the Reform Club. The club is one of the most exclusive of London's political organizations and no woman had been admitted there as a guest before.

**Winnipeg Newspaper Union**

### DASHING MODEL

Georgette in effective stripes and colouring contributes a decorative note to this becoming model with yoke and waistline in pointed outline at front. The cascading jabot is made of plain georgette in harmonizing shades. For the 36-inch size, 3½ yards of 45-inch material with 1½ yard of 27-inch contrasting is sufficient to make it. Style No. 325 comes in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Clifton, a crepe fabric, and a crepe-satin, cañon-faille, crepe, printed handkerchief linen, men's silk shirting fabric and printed dimity are smart suggestions. Price 25 cents in stamps or coin (coin preferred).

### How To Order Patterns

### Tuberculosis Free Area

**Some Delay In Creating Disease Free Area In Manitoba**

There has been a delay in starting on the new tuberculosis free area in Manitoba as a result of a technical difficulty which has arisen. The present area centres around Carman and it was proposed to extend it north to Lake Manitoba, taking in a strip of territory about 50 miles in width and embracing the Portage Plains farming district.

The farmers in the area to be included in the disease free territory have sent the necessary petition to the Provincial Government asking that this be done, but the federal regulations apparently require that a formal request for the creation of a disease free area be sent to Ottawa by the Provincial Minister of Agriculture. This has not been done in the present case. The Federal Department of Agriculture has received an informal request by letter from J. H. Evans, Deputy Minister of Agriculture, but the formal application from Hon. Albert Prentiss has not yet come to hand.

Until it does the Federal Department cannot begin the work of cleaning up new territory. In the meantime, therefore, the inspectors have been sent to central Saskatchewan where a new disease free area is being created in the Last Mountain district.

### Wheat Prices

**Figures Indicate That Wheat Pool Has Raised Average Prices Of Canadian Wheat**

According to figures compiled by the United States Department of Agriculture, for eight years prior to the introduction of pooling, the average price of wheat at Minneapolis was 7½ cents higher than in Canada. These figures exclude the war period when wheat was under control. However, when the Canadian Wheat Pool was inaugurated in 1924, the position was immediately reversed, and in a few months Canada's wheat commanded a good a price as that of the United States. During the second year of the Pool's operations, the price of Canadian wheat averaged 10 cents per bushel above American prices. Since 1925, Canadian wheat has consistently secured a price above that of the United States, and on July 18, 1929, there was a difference of 27½ cents between Winnipeg and Minneapolis quotations.

Mrs. Bee—"Doesn't your husband mind the long ride in from the office every day?"

Mrs. Gee—"Oh, no; he usually has a new maid along."

"My husband wants you to change a \$20 bill for him."

"With pleasure. Where is it?"

"It will probably send it in the morning."

"Diner: Here! Stop spilling that soup on my coat."

Walter: "Don't fret, Sir! We have plenty more in the kitchen."

Christianity was first carried into Japan by Xavier in the sixteenth century.

### PRINCE'S TROPHY

The only trophy presented by His Royal Highness on the continent of America, the Prince of Wales Cup, will be the prize offered to golfers who compete at the Banff Springs Hotel September third to sixth next. Competitors will mainly be drawn from among those taking part in the unique golfers' tour of Canada, sponsored by the "Canadian Golfer," which starts out from Toronto, August 12, and goes to Victoria and return. On the outward trip the tour will stop over at Winnipeg, Lake Louise and Banff, and resuming the train trip through Regina, Winnipeg and Fort William, arriving at Toronto September 11.

### Heavier Production Of Flour

**Grain Absorption To End Of April Shows Big Increase**

The improvement in the production of flour and other cereals by the milling industry of the Dominion this year reflects itself in heavier purchases on the part of the industry of wheat and coarse grains. To the end of April, being the first nine months of the grain year, the producers had absorbed a total of 72,521,270 bushels of wheat, or nearly 6,000,000 bushels more than a year ago. Grinding of oats involved 8,386,173 bushels, or about the same volume as last year.

### Indian Lands Sold

Prices averaging \$20 per acre were paid for the lands comprising the Indian Reserves adjoining the towns of Berwyn and Fairview, in Alberta, disposed of recently by the Department of Indian Affairs. The highest price recorded was \$40 per acre paid by a Saskatchewan buyer for three quarters sections in the Beaver Reserve near Fairview.

### Early Vegetables Shipped

Ten car lots of early vegetables moved out of Vernon, B.C., on July 3rd, chiefly potatoes, beets, carrots and cabbages. Royal Anne cherries are going on in large quantities to Mission and to the Pacific coast canneries south of the line. The quality of the fruit this year is excellent.

When a man marries he thinks he is getting a mate, but often the supposed mate turns out to be a captain.

Our own C.P.R., in keeping with

## Luxury In Travel Attains

**The Apex Of Achievement In These Modern Days**

This is an age of more luxury in everything. Nearly every manufacturer plans to beat his competitors by producing an article that is better than that of his rivals, better to look at, easier to handle, more convenient and comfortable, something that panders to the sense of luxury.

In no way has this been more manifest in recent years than in the realm of transport. Automobiles, trains, ships, even airplanes are all designed nowadays to cater to the desire for luxurious travel.

One hundred years ago railway passengers rode in open wagons, sitting on bare planks. Twenty years ago those who could afford automobiles at all had to be content with open bodies. A closed body was only for the millionaire buyer.

There are no open wagons for railway passengers today; not even for cattle.

We are somewhat proud of our rolling stock on this continent. The latest Pullman cars are wonderfully fine and comfortable, yet over in the Old Land they believe, and with some truth, that they are years ahead of us in the matter of comfortable travel on the trains.

A Britisher gets a great laugh out of our sleeping cars. He gags in surprise when he takes his first night ride over here and finds that he has to tumble in, or climb in, to a sort of bunk, inserting himself onto a ledge or a shelf, as it were, and undress and dress by afeat of contortionism, on the bed. "Fifty years behind the times," he mutters to himself as he adjusts himself to the accommodation.

"Over home," he walks to the sleeping car, opens the door of his cabin, has plenty of room to move around and take off his clothes, hangs them up in a cupboard, can wash in a basin, get swimming water, turn into a real bed, and in the morning he may ring the bell for the attendant to bring him a cup of tea, or even breakfast in bed.

The latest dining cars in British are now a suggestion of being on a train at all. They are made to resemble a dining room in a hotel as near as possible. One company has organized a contest for the best designs and decorations of cars that will eliminate the train environment.

Between Paris and London there is the most luxurious train in the world. It is called the "Golden Arrow," and although the English Channel intervenes, the train is practically the same. If anything, the train on the French side of the water is the more comfortable because the coaches are wider.

The interiors are just as luxurious as the rooms in a swagger hotel. No need to go to any dining car, either. The waiters bring your dinner to your seat and set it on a folding table. Linking the two trains is a correspondingly luxurious "Golden Arrow" steamer—and you know how luxurious steamers can be.

Our own C.P.R., in keeping with

the best traditions of the Canadian and White Star liners, have ships between Montreal and Liverpool and other ports on the other side, which have swimming pools, gymnasiums, nurseries, and ball rooms. The staterooms are similar to the prettiest rooms in a stately home, with curtained windows instead of port-holes. The dining rooms might be the main dining room of the Royal York, Hotel.

Passenger airplanes have Chesterfield chairs, a bar and dining-car service. Only twenty years ago the aeronauts passengers sat in open cockpit and hung on for dear life to the plane. Another transition from the open plane to the Pullman type.

And now, the old stage coach has given way to the super bus. Huge buses now run along the highways of the United States and England with upper and lower decks, big, roomy chairs, berths for sleeping in, a smoking room, a dining room and ice water always on tap.

With all these things, travel has surely reached the apex of its achievement. The age demands these things and is willing to pay the shot. When we cast our minds back, and think of our forefathers who slept on the decks of an old windjammer with a turpentine over them, in the course of two to three months crossing the Atlantic; of how they heaved the first loads out of the virgin forests and took weeks to transport their families and their belongings a matter of two hundred miles to establish their homes, we ought to have increased respect for their memories and cultivate a more contented spirit among ourselves.

### Holds Coveted Position

**Mr. Zzyzz Is Last In New York Phone Book**

Mr. Zzyzz is a man who interests us. Mr. Zzyzz is not a character in an expressionist play or an obscure Victorian novel by an imitator of Dickens. Mr. Zzyzz is simply the man who is last in the New York phone book. After Zzyzz there is only finis. Being a newcomer to the directory this year, Mr. Zzyzz has drawn some attention to himself, for he has all at once supplanted Mr. Zzy and Mr. Zzy. He went the latter one better—one "Z" better—and the former was nowhere in lastness beside him. Just what awards and decorations attach to being last in a phone book has never been made clear. But there must be some advantage. One man changed his name from Zzyk to Zzy to Zzy in an effort to clinch the place. How vain, indeed, are human wishes. For along came Mr. Zzyzz to ruin Mr. Zzyk's (or Zzy's) ambition.

### A High Flag Pole

**British Columbia's Tallest Spur For Telephone Exhibition**

Carrying on her deck, what is said to be the tallest spur of Douglas fir shipped out of British Columbia, the Canadian National Steamship, "The Canadian Ranger," reached Montreal, recently from Vancouver, via Panama. This spar is 180 feet in length, measures 36 inches at the butt and is ten inches at the top. It weighs 25,000 pounds, and contains 5,000 feet board measurement. It was cut by the Timberland Lumber Company and forwarded as a gift to the Canadian National Exhibition, at Toronto.

### Discover Potash Deposits

The Consolidating Mining and Smelting Company, at Trail, when scouring the country for potash deposits which are needed at the plant for the manufacture of commercial fertilizer, is reported to have located large deposits south of Vernon, B.C. Samples on analysis are said to have run 6.30 per cent. potash, which is slightly above the average.

"But did you come to kill the old lady?"  
"I will tell you in case it should be useful to you later."—Moustique, Charleroi.

Royal York Hotel "Hello" Girls

If a telephone call to the Royal York Hotel brings the response that the line is busy, you can take it for granted that not one but eighty trunk lines are in use. There are 1,300 individual telephones handled by three private exchanges and the twenty-seven young ladies in the photograph operate the main switchboard. They were tested for voice and general disposition and selected out of hundreds of applicants. From your room phone you can call the hotel office, Toronto and out-of-town people and even overseas to Great Britain, as business or friendship requires.

WORLD HAPPENINGS  
BRIEFLY TOLD

Reports from northern salmon waters in B.C. indicate a good sockeye catch this season.

The River Shannon has been harnessed in the service of the nation and has started distributing light, heat, and power throughout the Free States.

The Furness liner S.S. Nova Scotia, made a record trip from Liverpool when she docked at St. John's after five days and eleven hours on the Atlantic.

Government aid in the erection and operation of Canadian radio broadcasting stations for the benefit of Canadians has been recommended by the Kiwanis Committee of Public Affairs for Canada.

Charles Morse, K.C., registrar of the exchequer court of Canada, has been appointed an acting judge of that court for the purpose of dealing with appeals arising out of the revaluation of soldier lands.

On the arrival of the Canadian mails in London, recently, a portion of the Montreal airmail was found to be rifled. It was reported that many of the registered packages of considerable value were missing.

The visible supply of American grain shows the following changes in bushels: Wheat, increased 5,968,000; corn, decreased 660,000; oats, decreased 158,000; rye, decreased 80,000; barley, increased 170,000.

Lieut.-Col. J. S. Rankin has been appointed junior solicitor in the department of national defence, it was announced by the civil service commission. Before moving to the capital, recently Lieut.-Col. Rankin resided in Regina.

Daylight saving with clocks turned ahead two hours instead of one hour as in western countries, may be adopted in Japan, beginning with the summer of 1930. The proposal already has received tentative government approval.

Cleaning clothes with gasoline and smoking at the same time proved fatal for Fred Weston, who died of severe burns in hospital at Winnipeg. He received his injuries a week ago, when he dropped a cigarette into a gasoline container.

## Advertising Alberta

## Province To Exhibit Products and Resources At U.S. Fairs

Alberta will again be advertised this season by an exhibit of agricultural products and natural resources to be shown at a number of state and county fairs in the United States. Arrangements were made by the Publicity Branch of the Department of Agriculture to show this display at fairs in Minnesota, Iowa, Nebraska and Kansas during August and September. A marked increase in the interest shown in the opportunities for settlement in Alberta and in emigration to the province is reported from the localities in which similar exhibits have been shown during the past few years.

## Cold Storage For Fruit

Word has been received that the Federal Department of Agriculture has made a grant of \$7,000 towards the enlargement of the cold storage facilities of the Vernon Fruit Union. This will enable the Union to store 70,000 boxes of apples at one time.

## Our International Boundary

The International Boundary between Canada and the United States, including Alaska, is 5,500 miles in length.

Little Waldo was much impressed by his first trip through the garden. Coming to the morning glories, he shouted: "Oh, mother, come see the vine with the loud speakers!"

A scientist has discovered that housecleaning is caused by a microbe.

The Doorkeeper who had been a footballer.—Söndagsnisse—Strix, Stockholm.

## Tentative Schedule For Western Air Mail

Service To Be Inaugurated In October According To Present Plans

The new mail service in Western Canada operating between Winnipeg and Regina, between Regina and Edmonton, and between Regina and Banff, will be inaugurated early in October, if ground work can be completed in time it was announced by the post office department. A tentative schedule drawn up will send a plane racing West from Winnipeg at 9 o'clock central standard time, every night to arrive at Banff at 6:45 a.m., Mountain time, early enough to have mail transferred to the train which left Winnipeg the previous morning.

Normally, postal matter mailed at Winnipeg during the 12 hours previous to the take-off of the plane would not reach Banff until the day after the machine's arrival. The new service by making use of a night flying route will be able to bring about a saving of 48 hours on matter mailed at Winnipeg and destined for the Pacific slope and 24 hours on transcontinental mail from points further east than Winnipeg which will be transferred from the train arriving at Winnipeg and rushed ahead by air to overtake the train which left the day before. The east-bound mail will leave Banff at 11 p.m., Mountain time, and will arrive in Winnipeg at 9:15, central standard time the following morning catching the train which left Banff 24 hours before.

The schedule of the branch route between Regina and Edmonton has not yet been drawn up in any definite form.

## Winnipeg Newspaper Union

834

## SNUG HIPS

Smart, becoming and practical, a wide band gives the desired snugness through the hips and a slight blousing to bodice. The French V front adds length to figure. Design No. 834 combines printed and plain geometric patterns. It is made in black, pink, blue and white, cool and flattering for all-day wear. Printed silk crepe, canton-faille crepe, men's silk shirting fabric, pique, printed linen, waist and flat silk are some of the other smart suggestions. Pattern comes in sizes 16, 18, 20, 22, 26, 30, 34, 40, 42 and 44 inches bust measure. The 36-inch size requires 2½ yards of 40-inch material with 1 yard of 36-inch contrasting. Price 25 cents in stamp or coin (coin preferred).

## May He Would

"I'll bet if I was married I'd be boss and tell my wife where to head in," declared the bachelor.

"Yes," retorted the old married man, "and I suppose when you get to a railroad crossing you honk your horn to warn the oncoming express to get out of your way, don't you?"

## Pioneer Missionary Honored

Prominent Citizen Pays Tribute To Memory Of Father Lacombe

In honor of the man whom the Indians called "The Noble Soul" and "The Man with the Good Heart," and who has come to be known in history as one of the greatest pioneers in Western Canada, 3,000 men and women gathered at the little town of St. Albert, nine miles out of Edmonton, on the Canadian National Railways.

"For sixty-seven years he labored for God, his fellow men and his country," says the inscription on the base of the monument to Father Lacombe, and citizens prominent in the affairs of the northwest and of Canada itself paid tribute to him as a man, a teacher and a builder.

Born in Quebec in 1827, Father Lacombe came west in 1849 and built his mission at St. Albert nearly 60 years ago. Today, high on the hill, and within a step of the old log church which afterwards became the Cathedral, stands the life size figure in bronze of the great missionary. With cross uplifted in the days of his heroism among the Indians, Father Lacombe stands and looks down over the valley. The statue was brought from France by means of the efforts of Rev. Father Jan. O.M.I., parish priest of St. Albert, assisted by prominent citizens and old timers of Alberta and by a group of patrons of which one of the most interested was Sir Henry Thornton.

The statue was unveiled by Patrick Burns, of Calgary, old friend of Father Lacombe, and addresses were delivered by Hon. Charles Stewart, Minister of the Interior, and Ligonry Lacombe, M.P., relative of the honored missionary and representative of Quebec.

No contribution ever made by his department gave him more satisfaction than the memorial park which had been set aside at St. Albert and in which the monument stood. Hon. Charles Stewart said in his address, "The Alberta government gave its assistance and the Canadian National Railways donated and brought the gravel for the highway leading to it. In commenting on the creeds and races, and stations, represented in this gathering in honor of a great citizen, Mr. Stewart declared that the complex problems of race and creed in Canada would be settled by the broad tolerant spirit which characterized today's ceremony.

Quebec, said Ligonry Lacombe, was proud to have given birth to the son who became the hero of the finest pages of the northwest. Father Lacombe was a colonizer who saw the future of the prairies with confidence. And his sowing, scattered in the soil of sacrifice, was bearing rich fruit.

## Bisley Veteran Dead

R. T. Calger Had Not Missed Meet Since 1860

R. T. Calger, outstanding veteran of the National Rifle Association's meeting at Bisley Camp, is dead, at the age of 80 years. He was known and beloved by marksmen from Great Britain and all parts of the empire.

Calger saw Queen Victoria fire the opening shot in 1860. He competed himself for the Queen's Prize that year and many years since, and until last meeting recently concluded, had never missed a single meeting.

Right up to the last Calger could sing a song with the best of the visiting marksmen.

Chief—You want time off to be married? You only returned from holidays yesterday. Why didn't you get married then?"

"I didn't know the lady then."

A total of 576 films was shown in Finland in 1928. Of this number the United States supplied 364.

## IMPERIAL ECONOMIC CONFERENCE

Golden Text: "Be not drunken with wine, wherein is riot."—Ephesians 5:18.

Lesson: Daniel 5:1-31.  
Devotional Reading: Psalm 1.

Explanations and Comments

Belsazar's Feast, page 1-4.—Belsazar invited a thousand of his lords to a great feast, at which they drank wine from the gold and silver vessels which his wife, the Queen of Sheba, had taken from the temple in Jerusalem. And as they drank they praised the gods of gold and of silver, of brass, of iron, of wood, and of stone.

Quick the king spoke, while his proud guests pursued, "The servant went and returned.

He bore on his head the vessels of gold

Of Jehovah's temple the plunder

With daring hand, in his frenzy grim,

The King seized a beaker and filled

to the brim,

And drained to the dregs the sacred

cup,

And foaming he cried, as he drunk it

up, "Jehovah, eternal scorn, I own,

To Thee, I am monarch of Babylon."

Thus the German poet Heine pictures the scene. Even to a pagan mind such a use of sacred vessels was sacrilegious; but the boldness of the Most High God.

The Writing On The Palace Wall

Which the Wise Men Fail To Interpret, verses 5-9.—While they were thus revelling, they saw the fingers of the hand of the King of Heaven tremble and call for the enchanters and soothsayers to interpret the writing, but they could neither read nor interpret it.

On the Queen's Advice, Daniel Is Brought Before The King, verses 13-16.

The Queen entered the banquet house and tried to calm the king by telling him that there was a man in his kingdom whom Nebuchadnezzar had overlooked, and he could interpret the dream. So Daniel was sent for.

The king told Daniel that he had heard of him, and his wisdom and skill in interpreting writing, he should be clothed with purple (the royal attire), have a chain of gold about his neck and be clothed like a ruler in the kingdom.

The Interpretation Of The Writing, verses 25-28.—This is the writing, "Tekel, Upharsin," that is, "Numbered, Numbered, Weighed, and Divided." On the Queen's advice Daniel interpreted the dream.

"We fool, shall be weighed in the balance and found what? If we put our lives into God's hands now, we need have no fear of passing into His hands, but they are not greater than those of Belshazzar. We have our equipment and our opportunities and they may be even greater than his because of the love he has for them. But this is certain: we have what Belshazzar had not—the example and teaching of Jesus Christ and the grace that never fails those who avail themselves of His divine power."

J. W. G. Ward.

Radio and Good Music

Broadcasting Of High Class Orches

tras Giving Place To Jazz

Radio started upon its spectacular career as something of a toy. It was a contrivance which the mechanically minded could fool with in their spare time and which they could use to amaze the uninitiated by the miraculous results of their ingenuity. Soon it took on more formidable proportions and before most of us realized its potentialities it was not only providing universal entertainment but proving itself an important factor in our cultural progress. Is this upward curve in radio development to be continued? Or, having reached such heights, is the curve to turn downward?

This question is inspired by the fact that radio music is sinking into the doldrums. There are more jazz and less concert music on the air than there were a year or two ago. The broadcasting of the recognized orchestras is being cut down in favor of popular song and dance numbers.

If this tendency continues the radio will be losing an unprecedented opportunity. One of its greatest assets is its ability to bring good music into the homes of people who have never had the opportunity to appreciate what music can be. It has done much to develop a taste for the classical as opposed to modern jazz and could do much more. It has a certain responsibility it cannot escape.—New York Evening Post.

## CANADA WOULD HELP U.S. TO STOP RUM RUNNING

Ottawa.—If the United States is prepared to check up on their own boats, Canada will consider any further reasonable measure to halt the liquor traffic across the border. This offer was made by Hon. W. D. Euler, minister of national revenue, in a statement replying to numerous petitions asking the government to refuse clearances to liquor-laden craft.

Canada is willing to keep Canadians out of the liquor export business, he said.

At present the United States has no regulation requiring their vessels to obtain clearances. Accordingly, the authorities there have no means of checking up on the activities of their own people, the statement points out. If the Canadian practice were carried out they would have a means of control which would provide in a large measure the remedy for the conditions for which they complain.

The statement reviews the rub-running situation between the two countries and in a general way replies to the barrage of communications which have been pouring in on the ministers from temperance people in Canada who wished that country to refuse liquor clearances.

The statement sets forth that practically 100 per cent. of the rum runners are American citizens who ply their trade with United States boats, but if Canadian citizens and Canadian boats engage in the traffic the government would be prepared to enact legislation dealing with the matter.

Only from two per cent. to five per cent. of the liquor consumed in the United States comes from Canada, the statement continues.

Canada spends a million dollars a year preventing liquor-smuggling from friendly countries which do not prohibit clearances.

Mr. Euler unequivocally denies that the government is favoring the liquor interests as a return for campaign funds. He points to the legal actions against brewers and distillers as proof of this.

Considerable emphasis is laid on the fact that the boats engaged in liquor-running along the Canadian border are required to get clearances by the Canadian government, but not by the government of the U.S. Mr. Euler thinks if the U.S. authorities would require clearances it would largely remedy the situation.

Should the Dominion Parliament enact legislation prohibiting clearances, the effect would probably be to "drive the traffic underground, saddle us with heavy expenses and do our neighbors no good."

## Hoyt Returns To New York

**Plane Only Slightly Damaged In Making Forced Landing**

Winnipeg.—After successfully breaking the record flying time from New York to Nome, Alaska, Captain Ross G. Hoyt, of the United States army, who was forced down by fuel trouble recently, on his return journey, at Valemount, British Columbia, about 40 miles from Jasper National Park, passed through Winnipeg over Canadian National Railways, his way to New York.

Flying by way of Minneapolis, Edmonton, White Horse, Yukon, Fairbanks, Alaska, and thence on to Nome, Hoyt made the flight, a distance of 4,300 miles, in 32 hours' actual flying time. It was on the return journey, near Valemount, when he first noticed the trouble, and not having sufficient altitude to make the closest landing ground at Henry House flats, near Jasper, he was forced to land in a little valley, which damaged his plane. The plane, although only slightly damaged, was beyond Valemount's facilities for repairs, and the plane was loaded on a freight car for shipment to New York.

"My disappointment in not being able to fly home," said Capt. Hoyt, "was offset by the wonderful kindness and the many courtesies which the Canadian National Railways extended to me."

### New Flying Instructor

Ottawa.—A. H. Wilson was appointed by the civil aviation branch as instructor of the Vancouver Flying Club. He replaces Percy Hainstock, who was killed in the crash of the club's plane two days ago. Wilson formerly conducted a flying school for the British Columbia Airways at Victoria, B.C.

W. N. U. 1796

### British Naval Reduction

#### Will Suspend Work On Cruiser and Submarine Construction

London, England.—In an intensely dramatic atmosphere, Rt. Hon. Ramsay MacDonald revealed to the House of Commons the policy of the Labor Government in the matter of naval reduction. He declared that his ministry was prepared to walk hand in hand with the government of the United States to avoid competitive armament and finally, after a final agreement had been reached, it was planned to summon the nations of the world into conference on the subject of general paring down of armed forces and materials by land and sea.

Premier MacDonald first told of his conversations with the United States ambassador, General Charles G. Dawes, who was himself seated in the distinguished strangers' gallery along with other diplomats.

The government's purpose, he said, was to make the Kellogg pact an effective influence in international relations.

For the present the government proposed:

1.—To suspend all work on the cruisers *Surrey* and *Northumberland*, now under construction.

2.—To cancel the building of the submarine depot ship, *Maidstone*.

3.—To cancel the building of two submarines already contracted for.

4.—To slow down dockyard work at other naval stations.

With regard to the 1929-1930 building program, the premier said in any case no further commitments would have been entered into before the autumn, but that no steps at all would be taken to proceed with it until the whole matter had received further consideration.

Premier MacDonald intimated October looked a likely month for his proposed visit to Washington for a conference with President Hoover for the purpose of advancing the objects of disarmament and world peace.

### Rust Resisting Wheat

#### Results From Experiments Are Being Confidently Expected

Ottawa.—The experiments looking towards a variety of wheat which will be "real wheat" and at the same time have complete rust-resisting qualities are being continued, said Dr. J. H. Grisdale, deputy minister of agriculture, here recently, and results are being confidently hoped for.

"While there are a number of rust-resisting varieties, certain difficulties have stood in the way of their development generally. At present those varieties are being experimented with in conjunction with the higher grades so that the results might produce a top grade of Canadian wheat to which the rust-resisting properties may adhere.

### Canada's Population

#### Total Population Placed At 9,796,000 As At June 1st, 1929

Ottawa.—Canada's total population stood at 9,796,000 as of June 1, 1929, according to an estimate issued recently by the Dominion Bureau of Statistics. This is an increase of approximately 38,000 persons over the same date last year, when the estimated population was 9,658,000.

The report, covering the years 1921-29 inclusive, further showed that the Dominion's population had increased by more than 1,000,000 persons during that period. In 1921, the census recorded 8,788,483 persons.

Save for Prince Edward Island and the Yukon, all provinces enjoyed population increases during the last year.

**Carried Patriotism Too Far**  
Winnipeg.—A. Kristjansson, a visitor from the United States, was fined \$25 and costs in police court on a charge of being disorderly in a public place. He complained noisily in a local theatre when the audience failed to applaud the American flag when a news reel picture was flashed on the screen.

**Grain Standards Board**  
Winnipeg.—The newly appointed Grain Standards Board, which will designate the new 75-25 out-turn standard for grain shippers, met here and approved, with one exception, standards for all grades from number one northern to number six wheat.

#### Appointed Acting Judge

Ottawa.—Charles Morse, K.C., registrar of the exchequer court of Canada, has been appointed an acting judge of that court for the purpose of dealing with appeals arising out of the revaluation of soldier lands.

### Steamers En Route To Hudson's Bay

#### To Carry Out Government Plans For Northern Development

Ottawa.—Canada's annual advance on the north is now in full swing. Four steamers are hurrying north in connection with the government's plans for the development of that great territory. Three of them are bound for Hudson Strait, and Hudson Bay, to provide aids to navigation so that all will be ready when the port of Churchill is opened. The fourth, the steamer "Beothic," is on her annual cruise to the Canadian Arctic archipelago where the various outposts will be visited.

The department of marine has sent the steamer "Armenmore" to Hudson Strait accompanied by the steamship "Samboy" to construct a direction-finding station at Resolution Island. The steamer "Acadia" is on her way to Churchill with a hydrographic party to survey the various coasts of the archipelago.

The department of marine has sent the steamer "Armenmore" to Hudson Strait accompanied by the steamship "Samboy" to construct a direction-finding station at Resolution Island. The steamer "Acadia" is on her way to Churchill with a hydrographic party to survey the various coasts of the archipelago.

With regard to the 1929-1930 building program, the premier said in any case no further commitments would have been entered into before the autumn, but that no steps at all would be taken to proceed with it until the whole matter had received further consideration.

Premier MacDonald intimated October looked a likely month for his proposed visit to Washington for a conference with President Hoover for the purpose of advancing the objects of disarmament and world peace.

Washington.—In a formal statement, President Hoover announced that the construction of the cruisers included in this year's naval building program would not be begun until there has been an opportunity for consideration of their effect upon naval parity which, he said, he expected would be reached between Great Britain and the United States.

The President declared he had read

of "real satisfaction" the statement of Premier MacDonald made in the House of Commons. Mr. Hoover declared the American people were "greatly complimented" by Premier MacDonald's proposed visit and that he would find a universal welcome in the United States.

"Mr. MacDonald, the president said, "has introduced the principle of parity which we now have adopted and its consummation means that Great Britain and the United States henceforth are not to compete in armament as potential opponents, but to co-operate as friends in the reduction of it."

Asserting that he could not but be responsive to the principles enunciated by MacDonald, Mr. Hoover declared the United States joins the British premier in his efforts toward disarmament in the same spirit.

Mr. MacDonald has indicated the good-will and positive intention of the British Government by suspension of construction of certain portions of this year's British program.

"It is the desire of the United

States to show equal good-will in our approach to the problem.

"We have three cruisers in this year's construction which have been undertaken in the government navy yards, the detailed drawings for which are now in course of preparation.

"Actual keels would, in the ordinary course, be laid down some time this fall. Generally speaking, the British cruiser strength considerably exceeds American strength at the present time and the actual construction of these three cruisers would not be likely in themselves to produce inequality in the final result.

"We do not wish, however, to have any misunderstanding of our actions and therefore we shall not lay these keels until there has been an opportunity for full consideration of their effect upon the final agreement for parity which we expect to reach, although our hopes of relief from construction lie more largely in the latter years of the program under the law of 1928."

### Killed By Bandits

Buffalo, N.Y.—A cablegram from Han Yano, China, reports the killing by bandits of Rev. Timothy Leonard, missionary with the Chinese Mission Society. Father Leonard was from Country Limerick, Ireland.

Centenarian Dies

London, England.—At the age of 102, Lady Noble, widow of Sir Andrew Noble, famous armaments manufacturer, died July 23, at Bath.

Lady Noble was born in Quebec, the

daughter of Alexander Campbell, a

native of Lower Canada.

### Canadian Pacific Directors Inspect New Duchess

Following the annual meeting of the Company, the president and directors of the Canadian Pacific paid their

first official visit to the "Duchess of York," latest of the 40,000 ton liners built for the St. Lawrence route to fly

the red and white required flag.

Left to right: Col. Henry Coombes, Sir Charles Gordon, James A.

Richardson, Senator F. L. Beque, Ross H. McMaster, Captain R. N. Stuart, V.C., D.S.O., and bar, U.S.N.C.

R.N.R., commander of the vessel, W. N. Tilley, K.C., E. W. Beatty, K.C., chairman and president, W. A. Black,

Sir Herbert S. Holt, and Grant Hall, senior vice-president.

### QUEBEC CONSERVATIVE LEADER

### Severe Earthquake In Iceland

Was Worst Shock Country Has Experienced In Years

London, England.—Reykjavik despatches to the London Daily Mail said the southwest coast of Iceland had experienced its most severe earth shock in years. Big concrete buildings in the capital swayed and terror-stricken inhabitants abandoned all houses in a few seconds. The shock was most severe near Mount Hekla. No casualties have been reported. Many of the island's residents spent the night under the open sky.

### New President Elected

Native of Winnipeg Honored By British Medical Association

Manchester, Eng.—Dr. Harvey Smith, a native of Winnipeg, was formally elected president of the British Medical Association. The association will meet in Winnipeg next year, and Dr. Smith remarked the invitation to visit Winnipeg had first been extended when the association met in Montreal 33 years ago.

"It seems a long time to wait, but ultimately the great reward comes to us," he said.

### CHINESE ANXIOUS TO AVERT WAR WITH RUSSIA

London, Eng.—Rt. Hon. Arthur Henderson, foreign secretary, told the House of Commons that he had reason to hope that the danger of war would be averted in the Russo-Chinese situation.

He said he had received from the Chinese charge d'affaires assurance from the Chinese Government that it was anxious for a peaceful solution, that it would take no aggressive action and that it was ready for a round table conference with Soviet representatives.

The assurance added, said Mr. Henderson, that if Soviet Russia should resort to forcible measures the Chinese government would appeal to the League of Nations under articles of the Covenant.

Suggestions were made in London that the Chinese nationalists government has asked the Japanese government to intervene in its controversy with Soviet Russia to avert actual hostilities between them.

The visit of the Chinese minister, Mr. Wang upon Baron Shidehara, Japanese foreign minister at Tokyo, was believed to have offered the opportunity for such a request. There was some speculation as to whether the Chinese authorities in the reported arrest of 300 other Russian employees of the Chinese Eastern had not further complicated the situation which had begun to appear much less tense than formerly.

It was believed in any event that the Chinese action, which Reuters said it had learned authoritatively had been taken in closing the Manchurian southern railroad to troop movements, would deter militants among the Chinese who would thus find their way into northern Manchuria greatly hampered.

Attention still was centred here upon the attempt of the United States to intervene. General belief was that the invoking of the Kellogg-Briand anti-war pact would be successful in averting hostilities.

London, England.—The British Government has no intention of increasing the number of British battalions in China in the near future.

Answering questions in the House of Commons, Right Hon. Thomas Shaw, secretary for war, gave this assurance. The minister declined to say whether he considered the present British forces in China adequate or large.

At present there are six British battalions and one battalion of Indian troops stationed in China, the minister said.

### PONTIFF EMERGES FROM VATICAN AFTER LONG WAIT

Vatican City.—The 59-year existence of "the prisoner of the Vatican" was ended as Pope Pius XI emerged from the Vatican palaces in a procession such as the Eternal City had not witnessed since the days of lavish medieval pageantry.

Following a long procession which was more brilliant and colorful than even the most enthusiastic had predicted, the head of the Roman Catholic Church was born from the wide entrance of St. Peter's Cathedral in the last hours of daylight.

He held between his hands the golden monstrance of the Sacred Host and there spread out around him the elaborately costumed officials and functionaries of the state Vatican City, flanked by the black mass of a vast crowd of spectators.

For a moment at the climax of the ceremony, the figure of the Pope was a mass of white and gold which appeared to be a scintillating statue as it rested motionless in the deep twilight and amid the countless candle flames in the hands of those around the altar.

The swaying chant of the choristers was stilled and the Pope blessed the crowd.

Pope Pius left the entrance of St. Peter's Cathedral at 7:35 p.m. at the end of a long procession which had passed around the square. He was returned to the altar at 8:26 p.m.

The procession formally marked the emergence of the Pope under the recently signed Lateran Treaties, as sovereign of the state of Vatican City.

Although he did not leave Vatican City territory, it was the first time since the fall of the church's temporal power in 1870, that a Pope had left the Vatican palace grounds.

The crowd was so great that officials found it difficult to estimate but far more than 200,000 persons packed the great square and all available surrounding points.

The long procession, its choirs chanting hymns, moved with great solemnity from the wide doors of the cathedral, proceeding around the colonnades and returning to the cathedral where the Pope, surrounded by the brilliantly costumed company, raised high the glittering monstrance and blessed the crowd. A splendid climax to the ceremony of the release of the prisoner of the Vatican.

### Aid For Wainwright

Supplies Sent To Stricken Town By Alberta Government

Edmonton.—A carload of emergency supplies, consisting of groceries, clothing and furniture, was sent to Wainwright by the provincial government for the relief of a number of families left in difficult circumstances by the big fire. This action was taken on the behalf of a report submitted by G. B. Henwood, deputy attorney-general, and H. A. Craig, deputy minister of agriculture, who visited the stricken town and conferred with a committee of the town council as to necessary relief measures.

### To Fulfill Speaking Tour

Winnipeg.—The speaking program of Hon. Herbert M. Marler, Canadian first minister to Japan, who was called to Montreal owing to the death of his father, has not been cancelled, it was stated by his secretary, A. L. Hall. Addresses which Mr. Marler is scheduled to give at Regina, Edmonton, and Calgary, will necessarily be delayed a week, but he expects to be present at functions in all three cities and arrive at Vancouver on August 5, for his trans-Pacific connection.

### No Reception For Riflemen

Ottawa.—No formal reception will be given the Canadian Bisley winners by the Dominion of Canada Rifle Association. It was announced by Col. R. J. Birdwhistle, secretary of the association. Any reception which Lieut.-Col. R. M. Blair, or Lieut. Desmond Burke may receive will depend on their own municipalities or military units.

### Churchill Mail Service

Churchill.—A mail service from Churchill was opened on July 18, the postal packets being carried through from Mile 445 by train.

## Should Prohibit Stunt Flying

Pilots Should Be Prevented From Taking Unnecessary Chances

Aviation officials at Ottawa state that Captain Golds, who, with a passenger, was killed recently in a crash near Montreal, had been stunt flying. It is not stated that this was the cause of the accident, but it has been the cause of many other fatalities. We think that, until planes become safer than they are now, stunt flying should be prohibited by law, at least there should be such prohibition when passengers are carried.

Flying in the best of planes, piloted by the most skillful and careful of aviators, is not without its hazards. Every day one can read in the papers of planes crashing while engaged in straight flying and in charge of experienced pilots. A plane goes into a nose dive and, in spite of every effort of the man in charge of the controls, crashes and bursts into flames, and it is all over with the unfortunate occupants. Yes, flying should be regarded as a serious undertaking. There is always the element of risk. The majority of planes, fortunately, do not crash, but some do even when carefully piloted. Several things may go wrong to send a plane to destruction.

This being so, the plane that is safely and surely flown has a better chance of keeping in the air than the one that is put through a series of stunts. A pilot's business should not be to provide thrills, but to make flying as safe as it is possible to make it. He cannot possibly do if he engages in stunt flying. Aviators should be serious-minded and not try to stage a circus in the air. Apparently, however, some of them are not built that way, and the law should see that they do not endanger their own and others' lives by stunt flying. Stop this foolhardy flying by prohibiting it.—St. Thomas Times-Journal.

### Too Much For Him

Boy Thought His Friend Carried Politics Too Far

Herbert had been taught to rise when his mother entered the room and to remain standing until she was seated or until she withdrew.

One day a boy friend came to see him. Herbert's mother came into the room where the boys were, and Herbert rose. His friend made no move, so Herbert asked him to stand up.

A few minutes later mother again entered the room, and Herbert jumped up, while his friend reluctantly rose to her feet.

When Herbert's mother entered the room for the third time and her son rose, he guest said, dismally: "I say, what do you think your mother is—the National Anthem?"

### Way To Learn Language

Singing Is Easiest Road Says Famous Singer Of French-Canadian Songs

Singing is the easy road to language learning according to Charles Marchant, of Montreal, famous singer of French and French-Canadian songs, who attended the 16th biennial convention of the National Federation of Music Clubs at Boston, recently. "You can always sing a language much better than you can speak it," said Mr. Marchant. "And not only do you learn it easier, but singing encourages you to study it. It arouses and maintains your interest."

New York City is the oldest incorporated city in the United States.

The hiss is the only sound which has echo.

### Cold Storage Temperatures

Proper Temperatures To Be Maintained In Handling Various Commodities

The following list of temperatures has been compiled by various sources, including the practical experience of a large number of cold storage warehousemen, and from data secured by investigators from time to time. These temperatures, given in degrees Fahrenheit, while not published as the last word on the subject, may be useful as a guide in handling the different commodities enumerated—Apples, 31 to 32 degrees; apple butter, 42; berries, to freeze, zero; berries, frozen to store, 10 to 15; berries, fresh—few days only, 40; butter, 5 to 10; cabbage, 32 to 36; cheese, long carry, 35; cheese, cool cured, 55 to 60; cranberries and carrots, 33; cream, 15; eggs, frozen, zero to 10; eggs 29 to 32; furs, undressed, 35; hams, not brined, frozen, long carry, 20; hogs, 22; lard, 40; livers, 20; Maple syrup, Maple sugar, 45; meat, to freeze, zero; meats, long storage, and beef, and lamb, etc., 18; meat, fresh, 10 to 30; days, 30; meat, fresh—few days, 35; meats, salt after curing, 43; milk, condensed, 34; oatmeal, 42; onions, 30 to 36; peach butter, 42; peaches, short carry, 50; peas, dried, 45; plums, one to two months, and, perhaps, 32; potatoes, for table use, 35 to 40; potatoes, to delay germination, 32 to 34; poultry, to freeze, zero; poultry, after frozen, 10; poultry, short carry, 28; poultry, dressed (fed), short carry, 30; ribs, not cured, 20; sauerkraut, 38; salt meat, curing, room, 38; shoulders, not brined, 20; sausage casings, 20; strained honey, syrup and sugar, 45; tenderloin, etc., 33; tomatoes, ripe, 42; tobacco, 42; wheat flour, 42. These and many other products are listed in Circular No. 47, entitled "Cold Storage Temperatures," available at the Publications Branch of the Department of Agriculture, Ottawa.

### Feeding Of Poultry

A Balanced Ration Consists Of Proper Amounts Of Protein, Carbohydrates and Fat

The feeding of poultry is more or less like the feeding of any other live stock, and the ration used must be varied according to the purpose for which it is intended. For successful feeding it is necessary to use grains, both whole and ground, green food, animal food, mineral food and water liberally supplied. Charcoal may also be used to advantage.

These feeds must not only be supplied, but they must be supplied in such quantities that they will form a ration suited to the purpose for which it is intended. Such a ration is called a balanced ration. "Poultry Feeds and Feeding," Bulletin No. 1 of the Department of Agriculture, at Ottawa, available at the Publications Branch, describes a balanced ration as one that contains protein, carbohydrates, and fat—the elements of nutrition—in the proportion required for the maintenance and repartition of the animal to which it is fed. This however is not all. In the light of more recent knowledge, it is known (1) that it is essential that the ration contains protein, not only ample in amount, but of the right kind; (2) that there be an adequate supply of mineral matter, and (3) that the ration contain sufficient vitamins of the right kinds.

### Labrador Duck Is Rare

Few people would care to give \$5,000 for a duck. This was, however, the value of one exhibited recently. It was a specimen of the Labrador duck, which is rarer than the famous great auk. Only forty-five specimens exist. It inhabited the north-eastern coast of America until about fifty years ago, when it disappeared suddenly, and not a single specimen has been seen in the neighborhood since.

### Rather Ambiguous

First sister (who has received picture postcard from father abroad): "What does your card say, Marie?" Second Sister: "It says, 'This is the mountain from which the ancients used to throw their defective children. Wish you were both here. —Dad."

### Erect New Show Building

The contract for the construction of the new sheep and swine show building at the Bégin Exhibition grounds has been awarded to a local firm of builders. Accommodation will be provided for about 700 sheep or swine, or about 136 head of cattle.

Victoria, Australia, plans to spend \$5,000,000 in building houses.

A burnt child dreads the fire but it's different with widowers.

### Appointed Director

James A. Richardson, of James Richardson and Sons, Winnipeg, who has been appointed a director of the Canada Colonization Association. It is announced by the Department of Colonization and Development, Canadian Pacific Railway. Mr. Richardson is a director of the latter Company, the Canadian Bank of Commerce, Canadian Vickers, Ltd., and either presides over or holds important office in over a score of other Canadian companies and institutions.

### Make Good Hay Crop

Oats Infested With Rust No Good As Grain

Fields of oats which have become badly infested with rust will generally give a better crop of hay than they will of grain. Rust first appears in the summer as dark reddish-brown or rust-colored lines, chiefly on the stems and leaf sheaths, sometimes also on the leaves and chaff. These lines will be found to contain a reddish powder. Later in the season the plants become covered with black lines. Rust lowers the yield of grain very materially, and where the infestation is severe on oats the crop may be made into hay by cutting when the kernels are in the milk stage.

### Western Dairy Convention

The dates for the 1930 Western Canada Dairy Convention have been set for the Royal Alexander Hotel, Winnipeg, February 4 to 7 inclusive, and all committees have been struck and arrangements are well under way. N. S. Dow is convenor of the Director of the Publications Branch of the Department of Agriculture, Ottawa. Issued by the Director of Publicity, etc.

### Just Superstition

The old superstition that the horns of a crescent moon foretell the weather by tipping up or down could not very well "work," for the position of the crescent moon on any given date is always the same in places having the same latitude.

### Britain's Shoe Trade

Great Britain is the world's greatest exporter of leather footwear. Last year British exports had a value of more than \$5,000,000, double that of American boot and shoe exports during the same period.

### Canning By Cold-Pack Method

Rules To Be Carefully Followed In Order To Ensure Success

Select fresh, ripe fruits, allowing the shortest time possible between time of picking and canning. It is not advisable to use overripe or soft fruit. Do not use fruit picked immediately after a rain as it becomes soft, and, in the case of strawberries, often has sand or dirt adhering.

Grade the fruits according to size, shape, degree of ripeness, and colour so that the contents of each jar will be as nearly uniform as possible. Pack over and remove all fruits with bruised or decayed parts.

Wash the small fruits by placing in a colander and sprinkling water very carefully over them.

The large firm fruits should be thoroughly washed, then blanched and cold-dipped where necessary to remove skins, etc.

Pack the fruit carefully into sterilized jars, packing as firmly as possible without crushing the fruits.

Fill the jars to overflowing with boiling hot syrup.

Adjust rubbers, cover and partly seal. Neither fingers nor utensils should touch the inside of jar or cover. Place jar in sterilizer and fill with warm water at least two inches over top of jar. The water should be about the same temperature as the jar to avoid breaking. Boil the required length of time.

Remove from the sterilizer and seal tightly, invert, and cool as quickly as possible, but avoid draughts as this is liable to crack jars.

Wash, label, and store. This and other valuable information appears in Bulletin No. 77, of the Department of Agriculture, entitled "Preserving Fruits and Vegetables in the Home." Copies may be obtained from the Publications Branch, Ottawa, Issued by the Director of Publicity, etc.

### Minerals In Canadian Arctic

No One Knows The Extent Of Mineral Deposits In Northern Canada

Exploration has indicated that the rocks of the Canadian Arctic archipelago are similar to those that characterize the northern and better known parts of the Dominion. A number of economic minerals are known to exist at different points, although the extent and value of these deposits, which include coal and Carboniferous and Tertiary age, and graphite, mica, and native copper of Precambrian age, have not yet been determined.

### But There Are Not

According to the Detroit News a commercial report says 15,000,000 pairs of cotton stockings were made in the United States in February, and there's another thing that would be fine for cleaning lamp chimneys if there were lamp chimneys.

In a day the average adult breathes 400 cubic feet of air.

### Plant Lice

Very Few Kinds Of Plants That Are Free From Injury By Insects

There are very few kinds of plants which are free from injury by the various species of plant lice, which are also known as "aphids" and "green fly." Plant lice are small delicate, soft-bodied insects; they multiply in numbers very rapidly and are capable of causing serious damage unless effectively checked. Some aphids, like the pea aphid, appear suddenly in enormous numbers and completely destroy sweet peas, as well as garden peas. The foliage of ornamental bushes such as the snowball, etc., is often rendered unsightly by the curling and deforming of the leaves caused by plant lice. There are a great many different kinds of plant lice in Canada; some are green, others dark-coloured, and some even red; a common red species is the one which occurs on golden glow. All are sucking insects and live solely on the juice which they extract from the host plants. Some kinds feed on the under side of the foliage, others cluster on the stems of plants, and others again are found attacking the roots. They secrete a sweet liquid known as honeydew which attracts ants and causes the growth of a sooty fungus which greatly disfigures the plants.

One of the best bulletins issued free by the Publications Branch, Department of Agriculture, Ottawa, is the one entitled "Insects of the Flower Garden and Their Control," and this advises that as the plant lice appear in early spring, garden plants should be examined at frequent intervals for their presence. The undersides of leaves and the upper portions of stems are the chief feeding places, and when the insects are first noticed the plants should be sprayed with a contact insecticide such as kerosene emulsion, while oil, soap, or a tobacco preparation. Whichever insecticide is used, must be applied so as to reach the places where the insects are clustered. Only the plant lice which are actually hit by the spray will be killed. For those kinds which are found attacking the roots of garden plants, such as asters, it is recommended to loosen the earth around portions of the roots and apply, freely, nicotine sulphate solution, in the strength of one teaspoonful to one gallon of soapy water.

Next to the strawberry is the blueberry, smaller than those of Eastern Canada, but superior in flavor, again due to the long hours of sunlight.

Besides being eaten fresh and preserved with sugar they are dried like currants and used for cakes and mixtures with pemmican.

Red and black currants are the former, which are more or less in their wild state on the prairies, being especially plentiful.

In no part of the Hudson Bay region is the eyeberry as plentiful as at Churchill River. They never grow in swampy ground nor in woods, but in small hollows among the rocks.

After the strawberry, blueberry and cranberry comes the raspberry in the estimation of the Churchillians.

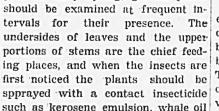

Many other species of berries abound there, but the natives, with such abundance of better fruit at hand, leave them to the birds.

It is well known that where strawberries will grow a species of apple may be developed that will prosper if the trees are guarded from the heavy frosts of winter. A century ago all berries grew in Lanark and Huron Counties, Ontario, and it was believed that apples and plums could never be grown on account of the snows and early frosts. The belief lasted for 25 years or so—Janet Munro in Canadian Forest and Outdoors.

Eye of the Housefly

The housefly has both compound and single eyes. The compound eyes are used for vision at a distance of one or two yards. Between the compound eyes are three single eyes, which are used for seeing objects only a few inches away.

Britons drink less milk than any other nation. Britain imports 62,000,000 gallons of milk.

She: "Each spring I am born again."

He: "How many times have you been born up till now?"—Moustique Charlot

### Wild Fruit At Churchill

Blueberries, Strawberries, Cranberries and Other Wild Fruit Grow In Abundance

Churchill is not a bleak waste. When Jens Munck discovered it in 1615, the river was heavily timbered and the forest abounded in small fruits. Although the forests have long since been denuded by fire and man's necessities, it is still a country of small fruit.

Cranberries grow there in abundance everywhere and in all situations. They are not the cranberry of the marshes of the east, but the smaller berry with decidedly more flavor. Packed in casks with sugar they last for years. In this form, in the old days, they were an important article of commerce for the Hudson's Bay Company's ships bound for England.

On the rocky areas near the ruined Fort Prince of Wales, gooseberries thrive and spread about the ground like vines. Due to the reflected heat from the stones and gravel, the fruit is always most plentiful on the under side of the bush. The diaries of the Hudson's Bay Company reveal that many a pig and artichoke were made from them before Wolfe ever set foot in Canada.

Heather berries, which grow close to the ground, are prized because of the fact that they make excellent wine. They abound in seeds and for this reason jam is seldom made of them, but the jelly is delicious.

In the swampy, boggy ground covered with moss, the dewberry or boggo-rommick, as it is called by the Indians, flourishes. It resembles a strawberry, with larger leaves. The single berry growing at the end of a stalk ripens in August and is valued not only for its flavor but for its anti-scorbutic properties.

The juniper berries, called crowberries by the natives, mixed with brandy make a very good wine. They are as plentiful as blades of grass.

It is the strawberry, however, which is most prized. On areas that have been burnt over and the moss removed and soil loosened, they grow in great abundance and to an extraordinary size. This is in part due to the long, sunshiny days of this northern latitude.

Next to the strawberry is the blueberry, smaller than those of Eastern Canada, but superior in flavor, again due to the long hours of sunlight. Besides being eaten fresh and preserved with sugar they are dried like currants and used for cakes and mixtures with pemmican.

Red and black currants are the former, which are more or less in their wild state on the prairies, being especially plentiful.

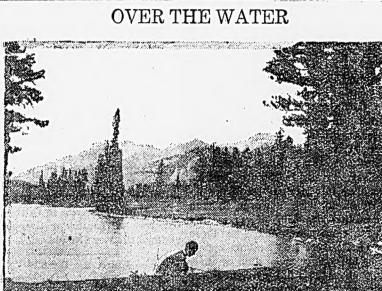

In no part of the Hudson Bay region is the eyeberry as plentiful as at Churchill River. They never grow in swampy ground nor in woods, but in small hollows among the rocks.

After the strawberry, blueberry and cranberry comes the raspberry in the estimation of the Churchillians.

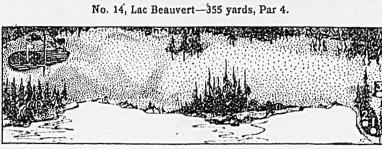

Many other species of berries abound there, but the natives, with such abundance of better fruit at hand, leave them to the birds.

A century ago all berries grew in Lanark and Huron Counties, Ontario, and it was believed that apples and plums could never be grown on account of the snows and early frosts. The belief lasted for 25 years or so—Janet Munro in Canadian Forest and Outdoors.

### OVER THE WATER

No. 14, Lac Beauvert—355 yards, Par 4.

355 300 200 100 DCA

The fact that the water in front of the 14th tee of the Jasper Park Lodge Golf Course is so clear that the ball can be seen when it rests thirty feet below the surface, isn't much consolation to the player who hooks his tee shot into the lake. A well driven tee shot goes straight to the green. A hook goes straight to the bottom.

Following the long 13th hole, this hazard is one to cause anxious moments to competitors in the Canadian Amateur and Western Canadian Amateur Championships at Jasper in August, and the Silver Totem Cup Tournament in September. The upper photograph shows the tee and the plan below, the hole in detail.

### To Revive Browned

At the International Life-Saving Congress at Trouville, France, it was demonstrated that it was possible by means of a new apparatus to revive persons who previously would have been considered dead from drowning. Thirty-five nations were represented at the Congress.

Mother: "Quit tracking mud on the living room rug, Johnny!"

Johnny: "All right, mom, where shall I track it?"

She: "Each spring I am born again."

He: "How many times have you been born up till now?"—Moustique Charlot

# Advertising Is News to the Community!

Many people of today wonder why the wise merchandise uses the advertising columns of the newspaper—it is because he has news of interest to the people residing in his community.

Advertising is a form of news. It is governed by the same general principles and answers your every question as to "what's news?" You can depend upon advertising news. It is truthful. If you want something for home or for dress with you will find it advertised.

Advertisements supply the surest way of knowing "what's news" in merchandise. Learn to read them—trust them the same as your local merchant trusts you.

During the past week one truck and one auto driver were both fined \$15 and costs in the Calgary police court and their drivers' license suspended for two months. on his return.

Lieut. Governor Newlands of Saskatchewan has refused the request of the opposing combined parties to oust Premier Gardiner and his cabinet. The Legislature is to meet on Aug. 3rd, when the position of the government will be defined.

When an eight months old baby was operated on at Wanganui, N.Z. recently, after it was reported to have swallowed a button, 26 pins, needles, safety pins and buttons were found in its stomach. The little one is recovering. An older child had fed the unusual mixed diet to the baby.

Report of the first threshing of the 1929 crop comes from the Taber district on the farm of Jas. Makinson, when barley was threshed which yielded 30 bushels per acre.

Looking over the coast and general condition of the company's western lines, Sir Henry Thornton will spend the week-end at Vancouver. He will visit Edmonton on the trip out and be at Calgary on his return.

## The Curfew.

Owing to the attitude taken by some parents and children during the past few weeks our attention has been drawn to the number of children allowed to run around the streets after the curfew has been rung. We have been assured that if this practice is continued there will be no alternative other than place an extra expense upon the ratepayers by the appointment of a permanent policeman.

Up to the present time the citizens of Chinook have prided themselves as a law abiding community, with neither a policeman or justice of the peace among them. However, some are beginning to think that day has passed, judging the appearance of many windows in buildings around town.

It is with much hesitation that we give this note of warning, and suffice us to say "lose not your good name for you know not the day upon which it may be regained."

## Gooseberry Lake Boys' Camp

Eight happy busy days were spent by the boys at the Gooseberry Lake C.S.E.T. boys' camp. By the evening of the first day, July 12th, forty-two boys had registered from various points of the district—Benton, Oyen, Milligan, Ida, Marey, Dorothy Neff with the exception of one subject. Vincent Rideout and Dorothy Carter have passed grade x successfully.

They were divided into four groups naming them after famous explorers: Grenfells, Capt. Scots, McKenzies and Columbus. These chose for their respective leaders: Beckett Lowe of Oyen, Alvin Bishell of Loyalist, Joe Sterrenberg of Consort, and Jamie Higgins of Coronation. Vincent Rideout, out of Chinook was chosen grand chief and filled his duties in an admirable manner.

A daily programme of Bible study, badge work, athletics, team games and camp duties was carried on. Besides this there were some special features—an eight mile treasure hike, two weiner roast hikes, specimen hunt, nature study, camp fire.

A number of boys proved themselves to be fine athletes, winning their running, throwing and jumping badges, and setting a high standard in some instances. Some fine swimmers were in camp, and under the instruction of Irving Gould, progress was made. Besides a number winning their Trail Runner swimming badge, two others, Vincent Rideout and Herman Vanhook, both of Chinook, qualified for their white honor Tuxis badge.

A total of forty badges will be distributed among the campers. These include running, throwing, jumping, swimming, campcraft, first aid, mission heroes, hiking. Douglas Tainish of Consort was the successful one to find the treasure after an eight mile hunt. One boy only, Duncan McFetridge of Consort, was awarded the camp chevron. He will wear it worthily. This is the highest honor that can be given to any camper.

Camp leadership was ably given by Business Manager C. H. Holmes, Secretary John Perry, Director J. R. Brown; Gordon Lapp, secretary boys' work for the province; Douglas Wollatt, W. W. L. Irving, Gould. We were very fortunate in having Gordon Lapp at camp. He made a great contribution to camp, and the boys will long remember the songs, the games and the leadership which he gave. T. Galloway was present and gave the boys some fine instruction in nature study. The boys were greatly inspired by an address given by the Premier, Hon. J. E. Brownlee, who was attending a U.P.A. convention at the lake. Not only his speech, but also his example a fine inspiration to the boys.

The eight days work went all too quickly, and though much had been accomplished there was still much to be done. On Saturday, July 20th, the boys said farewell to each other and left for their homes. It was a good camp, weather was ideal, with spring water running through camp it is an ideal camp site, good leadership was given, and a fine group of boys were gathered who did their parts well and entered enthusiastically into all the affairs of camp. Many expressed the hope that they might be back next year.

## Local Items

Homer Butts and family returned Sunday from Sylvan Lake and other points.

Mrs. August Roseau left on Tuesday morning for Milwaukee, being called there owing to the illness of her son.

Mrs. Ray, who has been visiting her daughter, Mrs. L. Cooley, for the past few weeks, returned to her home last week.

Miss Julia Peyton, after spending two weeks in town with her mother, returned to Renville on Sunday.

Mrs. W. S. Lee, two children and maid, Mrs. Lloyd Robinson and daughter and Willie Thompson son left by motor Thursday morning for Lacombe, where they will visit Mr. and Mrs. Tracy.

Harold Stewart has accepted a position at Saskatoon with an electrical firm and left last week.

Wm. Forgie was fined \$5 and costs for a disturbance in the bar of the Acadia Hotel on fair day.

Word has been received by mail this morning that the following pupils passed their grade xi departmental examinations: Lyle Began, Willie Thompson, Marvel Milligan, Ida Marey, Dorothy Neff with the exception of one subject. Vincent Rideout and Dorothy Carter have passed grade x successfully.

## Another Bad Auto Accident

to the right of the road, believing that he had ample time in which to get there. The approaching car swerved to the left, however, and then collided.

Mr. Anderson expressed the opinion that the lights on Mr. Dawson's car had, perhaps, blinded Mr. Sheets temporarily. Ellis Lydiatt, Brewster driver, Miss Elenor Niedzinski, who was a passenger in Mr. Anderson's car, Constable G. Ball, of the A.P.P., and Dr. W. D. Higgs, who attended Mr. Sheets, also gave evidence—Calgary Herald.

Kenneth Dawson has concussion of the brain in addition to other injuries, which will necessitate him remaining in the hospital for some time, though his condition is not considered to be at all dangerous.
